

SandyLock is looking for a pre-seed investment for smart beach cabinets start-up. At this stage, we are looking for a 50-100k to develop demo product and create legal basis. For necessary permissions SandyLock must be operating company in case to participate in public tenders.

Our team recently has been complemented by a motivated team of engineers and programmers with experience in the production of post machines and smart storage solutions for industry area, and they are responsible for the production of SandyLock cabinets (software, hardware). SandyLock advantage over competitors is easy and secure operation of beach lockers without using bank cards, cash, etc. Why SandyLock activities defined at the beach area? Because more then 57% of holidaymakers around the world choose to relax on the beach.

SandyLock business model is B2C, we, as service administrators, sell the service to the end user. The business development experience of our team members covers a very wide range of areas, from marketing to distribution of medical products. Our specialists has experience in programming, client experience, sales, business planing and so on.

SandyLock's latest achievement is an award from one of the largest IoT companies in the region, Teltonika, for the further realization of the idea of smart beach cabinets.

Everyone who wants to contribute to the development of the SandyLock idea is kindly invited to contact and discuss the existing cooperation opportunities.

Sincerely,

SandyLock Team
